Tutors: Bruce Mackay and Anna Galloway

Bruce Mackay BVSc FACVSc (Gold Coast)

Dr Bruce Mackay has been a veterinarian for 30 years since graduating from the University of Queensland (BVSc) in 1979. Spending most of his time in small animal private practice, he has a wealth of experience with small animal veterinary medicine. His clients and their pets inspired him to begin the long journey of study to sit his specialty exams. After training at University of Queensland, Murdoch University in Perth and Universities in California and North Carolina, he achieved his dream of becoming a Fellow of The Australian College of Veterinary Scientists in 2000. Dr Mackay co-founded Veterinary Specialist Services with the idea of providing excellence in veterinary medicine with a great team of specialist veterinarians all passionate about dogs and cats. Although very keen in all aspects of internal medicine, his special interests include gastro-enterology, endocrinology, cardiology and oncology. Bruce continues to be passionate about administering the best possible care to the animals he is privileged to treat. A wagging tail and a grateful lick still mean volumes to this veterinarian who has seen so many changes in his time as a veterinarian.

Anna Galloway, BVSc(Hons) MACVSc

Dr Anna Galloway graduated with a BVSc(Hons) from the University of Queensland in 1981. After a few years in small animal and mixed practice, she joined the staff of the University of Queensland (UQ) as a small animal clinician. She started working in veterinary imaging in 1986 as a university tutor and gained MACVSc (radiology) in 1988. Anna continued working in imaging at UQ as a radiology registrar until 2011.

She was granted extended study leave in the USA in 1992 to spend time developing ultrasound skills in veterinary schools in North Carolina, Colorado and California. She was a locum at The Animal Health Trust in Newmarket, UK, in 2005. She has been a membership examiner for the ACVSc on five occasions and was radiology chapter president for 3 years.

Anna established Vethelp Diagnostic Imaging, a mobile diagnostic ultrasound practice servicing Brisbane and surrounding areas in 2011 and continues to enjoy teaching in addition to travelling to practices performing scans.

Annie Rose BVetBiol, BVSc (Hons), MVS, MANZCVS (Radiology), GradCert (ClinEd)

Dr Annie Rose graduated from The University of Queensland and initially worked in general practice. She then completed an internship at the University of Melbourne and it was during this time that she developed her interest in diagnostic imaging. Annie worked for almost 15 years at The University of Queensland Small Animal Clinic, and enjoyed her role in both a clinical and teaching capacity. She has also had the opportunity to work for a few months in the radiology sections of The Ohio State University, USA in 1999 and The Animal Health Trust, UK in 2005. Annie is currently a resident in diagnostic imaging at the University of Melbourne Veterinary Hospital.
